STAT 443 HW 5 Caitlin Bolz

Variable	Reason
ADJINC	Adjustment factor for income and earnings dollar amounts is constant for all entries so can be omitted
DIVISION	Do not need division code because we are only looking at data from one state, meaning it is all from the same division
PWGTP1	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP2	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP3	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP4	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP5	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP6	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP7	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP8	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP9	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP10	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP11	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP12	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP13	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP14	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP15	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP16	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP17	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP18	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP19	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP20	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP21	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP22	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP23	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP24	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP25	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP26	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP27	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP28	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP29	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP30	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP31	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP32	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP33	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP34	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP35	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP36	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP37	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP38	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP39	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP40	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP41	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP42	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP43	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP44	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP45	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP46	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP47	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP48	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP49	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP50	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP51	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP52	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP53	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics

PWGTP54	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP55	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP56	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP57	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP58	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP59	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP60	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP61	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP62	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP63	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP64	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP65	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP66	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP67	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP68	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP69	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP70	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP71	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP72	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP73	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP74	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP75	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP76	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP77	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP78	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP79	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
PWGTP80	Weighting replicate shouldn't be used in model, it is used for calculating mu hat and related statistics
REGION	Do not need region code because we are only looking at data from one state, meaning it is all from the same region
RT	We are only looking at personal data for this project, so they are all going to have P in this column, so not needed
SERIALNO	This variable is essentially subject ID, which is uniquely distinct for each individual so it cannot be used for prediction.
ST	Do not need state code because we are only working with data for one state
